TCR Series (LEAD FREE)

HITANO

1. Scope

This specification applies to Epoxy-coated Solid Electrolytic Tantalum Capacitors (LEAD FREE).

2. Product identification

T C R	1 0 0	M	1 6	A	Т	1
<u>(1)</u>	(2)	(3)	(4)	(5)	(6)	(7)

Part no. Designation:

- (1) series: TCR represent series number of epoxy-coated solid electrolytic tantalum capacitors
- (2) capacitance code: Capacitance expressed in micro farad ,1st two digits represent significant figures and 3rd digit represents multiplier(number of zeros to follow). Dot will be marked as 'R'
- (3) capacitance tolerance: Capacitance tolerance code is listed as follows:

Allowable Tolerance Code of the Capacitance

Allowable Tolerance%	Tolerance Code
±5	J
±10	К
±20	М

- (4)Rated DC voltage: Rated DC voltage Code is expressed in two digits. Example as under: 4V = 0G, 6.3V = 0J, 10 = 10V, 16 = 16V, 20 = 20V, 25 = 25V, 35 = 35V, 50 = 50V
- (5)Packing style: Packaging Code: B: Bulk. R: Tape and Reel. A: Ammo Pack
- (6)Lead length Code: S =short lead cut to 5mm length, L =Long straight T =Taped type
- (7)Lead Space: 1 = 2.5mm, 2=5.0mm (Standard pitch follow the size table except Taped type)

3. The range of the specification

table I

Nominal cap. Range	0.047~3	330µF						
capacitance tolerance	±20% or ±10%							
Rated voltage(VR)	4V 6.3V 10V 16V 20V 25V 35V 50V							
Surge voltage(VS)	5.2V 8V 13V 20V 26V 33V 46V 65V			65V				
Temperature range	-55℃ ~ +125℃							
The life test	1000Hr

HITANO

11.1.2 TAPPING PACKAGING

1) SCOPE

This specification covers the requirements for TCR series type resin-coated tantalum capacitor(lead free).

2) PACKING MATERIAL

ITEM	SUBSTANCE
CARTON BOX	CORRUGATED PAPER
PACKING CTN	CORRUGATED PAPER
PASTEBOARD	THICK CRAFT PAPER
PLASTIC BAG	COMMON WHITE PIASTIC BAG
HOT MELTING TAPE	CREPE PAPER AND RUBBER
	ADHESIVE

3) PACKING UNIT

a) The capacity of packing ctn.

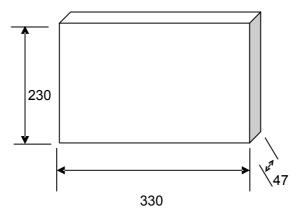

Every carton contains 10 packing box.

b) Every packing box contain quantity as follow:

CASE	QUANTITY(PCS)			
A	2500			
B/ C	2000			
D /E /F	1000			

4) THE SHAPE AND DIMENSION OF PACKING BOX

Unit: mm

5) THE PACKING METHOD

- a) At the beginning and the end of TAPING there is 3 more pitches of vacuum goods.
- b) When the TAPING packs, every 25pcs has a fold line, besides the fold line there is half of pitch of vacuum goods.

6) STORAGE

Have the products keeping in constant temperature and constant humidity. Storage time is two years after manufacturing.

7) LABEL OF PACKING CTN

Every packing ctn has a piece of label.

TCR Series (LEAD FREE)

HITANO

11.2 Bulk

Packing product in plastic bag A/B/C case: 1000pcs per bag D/E case: 500pcs per bag F case: 250pcs per bag

12. The method of mounting

Recommend the method of mounting: the capacitor directly insets PCB when it is used. The body and the lead are steadied in the application of the vibration and shock tests, the distance between the body and the mounting point shall be 6±1mm.

Recommended Soldering condition: The TCR lead-free product generally uses wave soldering.

Pre-heating: 150'C±15'C /60-90s Max. peak gradient: 2.5°C /s

Time at>230°C:40s Max.

13. Note in use

- 13.1 For circuits with low resistance circuit, make the use voltage be 1/3 or under of the rated voltage; in general circuit, make the use voltage be 1/2 or under of the rated voltage.
- 13.2 In case of circuits with large instantaneous rush current or rapid charging/discharging circuits, connect the protection resistor of $3\Omega/v$ or more in series to the capacitor to limit the current to 300mA or less. when the protection resistor can not be inserted, lower the use voltage to 1/3 or under of the rated voltage .
- 13.3 Use the capacitors within the permissible ripple voltage specified independently. Use in the range that the sum of the DC voltage value and the peak value of ripple voltage does not exceed the rated voltage. Design not to apply over voltage made by fluctuation of superimposed DC voltage or reverse voltage to the capacitors.
- 13.4 Use the capacitors within the specified use temperature range. In case use temperature exceeds +85°C, apply the reduced voltage shown in the below figure as the rated voltage.
 - 13.5 environmental conditions

do not use the equipment fit with the capacitor in the below environment.

- Environment where capacitors are directly splashed with water, salt water and oil.
- Environment where capacitors are directly exposed to sunlight.
- Environment in high temperature and humidity causing dewing on capacitor surface.
- Environment where capacitors touch various active gases.
- Acid and alkaline atmosphere.
- Environment with high frequency induction.
- Environment with excessive vibration and shock...

TCR Series (LEAD FREE)

HITANO

14. Storage

14.1 storage condition

relative humidity: no more than 70%

14.2 storing period

No more than one and half year since date of stocking.
